FREE TREATMENT FOR PEOPLE AFFECTED BY PROBLEM GAMBLING

Are You Or Someone Close To You Affected By Problem Gambling?

At Cairnmillar, we have developed a new treatment approach to help people affected by problem gambling. This treatment is a six-session program that focuses on restoring and enhancing personal confidence in people who recognise that they are starting to gamble too much. This is an innovative approach which emphasises people's innate ability to overcome problems.

We are looking for people to participate in this different program as part of a research project.

This program of specialised gambling treatment is completely **free of charge**. If you, or someone close to you could benefit from this program, please contact us to express your interest.
